

of series HONOR JERMAD - Sphere

DESCRIPTION OF LUMINAIRES:

Material:

The body is an aluminium cast with a screw for glazing. It is available in Dekora (mark D) or Norma (mark N) design.

Finishing:

powder coated tints of RAL

Glazing:

polyethylene in opal finishing
 Glazing excels with its resistance against shocks and outer influences (especially UV emission) and can be fully recycled.
 Changing of a lamp can be performed without using tools, glazing is connected with the body by a screw connection.

Diffuser is a closed profile that provides a high degree of protection, it is made in opal finishing.

Protection:

IP 65 guarantees perfect inner cleanness of a luminary necessary for economic running. Thanks to this it is not necessary to do any inner maintenance of the luminary.

Electro-equipment:

- high pressure sodium lamp
- HPS 50 - 100 W / E27, E40
- high pressure mercury lamp
- MV 80 - 125W / E27
- compact fluorescent
- CF 23W / E27
- metal halide lamp - MH 50-100W / E27
- incandescent lamp max. 150W / E27

Mounting disposition:

Both variants of luminaires can be mounted on a bracket or a body of a pole of ø 60 mm.

Recommended use:

Decorative lighting of streets, parks, car parks, pedestrian zones, etc.

Lighting - technical proposal:

A part of a delivery is a proposal of dislocation of luminaires according to required quality of illumination.

Accessories to the luminaire K 500

Shade S

Is made from coloured polyethylen resistant to shocks and outer influences (especially UV emission) and can be fully recycled. It is made in black, green or brown colour.

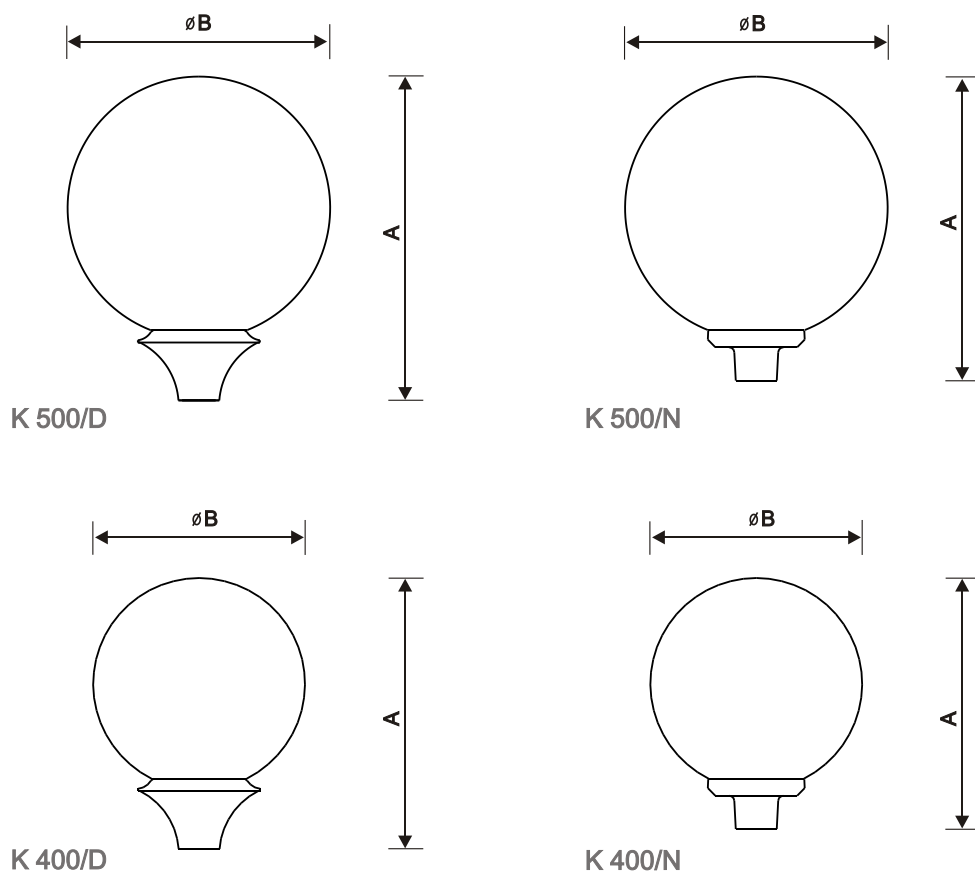

Shade is made in a shape of a hemisphere (mark S01) or an upright cone (mark S02) with a wide or narrow edging (mark u).

Use:

For additional shading already installed luminaires K 500, for restriction of illumination facades and light pollution.

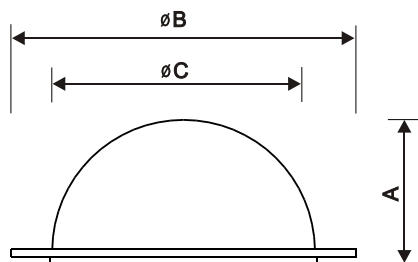

Exterior luminaire of series HONOR JERMAD - Sphere

Variations		Name	Measurements(mm)		Weightt (kg)
