Diffuser: UV stabilized plastic
Lampshade colour: white
Power supply: 230V 50Hz
Lamp: compact fluorescent 23W / E27
Colour of cable: yellow, red, blue, grey, green, black, white

- Simple hanging light, plastic lampshade in the shape of a ball with a diameter of 40 cm made from UV stabilized plastic with a round hole in the bottom of the luminaire with diameter of 220 mm. The luminaire throws a strong light directly from the lighting source through the hole in the bottom of the luminaire and the light shines through the milky coloured lampshade across the whole room. The lampshade is made of UV stabilized plastic.
- Cable is manufactured in seven colors and the length is up to 1000 mm, therefore is suitable for public spaces with higher ceilings or with needs to place the ball very low.
- Simple and functional design combined with pastel colors of the cable gives nice combination of playfulness and elegance.
